

EYUEL WOLDESENBET

Senior Civil Engineer

Addis Ababa, Ethiopia | +251 94 240 4882 | eyueltekle@gmail.com

PROFESSIONAL SUMMARY

Senior Civil Engineer with 10 years of experience spanning on-site construction supervision in Ethiopia and remote civil engineering consulting for United States-based construction and design firms. Skilled in project scheduling, quality control, quantity surveying, and payment certification on active construction sites, combined with technical drafting, hydraulic analysis, and procurement support delivered to international clients. Proficient in AutoCAD, SAP, ETABS, MS Project, and Google Earth Pro-based site analysis. Known for disciplined quality assurance, clear technical communication across teams and time zones, and dependable delivery against project schedules.

CORE COMPETENCIES

- Construction Supervision & Quality Control: schedule monitoring, work-method verification, quantity approval for payment certification
- Project Planning & Coordination: scope definition, budgeting, resource and procurement planning, multi-disciplinary team liaison
- Technical Design & Drafting: 2D/3D AutoCAD modeling, structural shop drawing review, hydraulic and drainage design
- Remote Site Analysis: Google Earth Pro topographic evaluation, roof/site takeoffs, drainage area calculation
- Procurement & Contract Support: technical bid evaluation, subcontractor scope review, material specification compliance
- Documentation & Reporting: RFI management, submittal processing, engineering change orders, as-built records

PROFESSIONAL EXPERIENCE

Remote Civil Engineering Consultant July 2025 – Present

Stern Gutters — United States

- Perform high-precision remote measurements and quantity takeoffs using Google Earth Pro to determine roof geometries, slope calculations, and catchment areas for stormwater and gutter system design.
- Translate satellite-derived site data into structured engineering reports and material schedules within strict 12-hour turnaround SLAs, aligning hydraulic capacity calculations with local plumbing codes.
- Apply a dual-verification quality process to remote measurements, maintaining under 1% error margins and reducing material waste during installation.
- Authored a Standard Operating Procedure (SOP) for virtual site assessment, standardizing the transition from aerial imagery to technical schematics for field crews.

Remote Civil Engineering Coordinator November 2024 – January 2026

Plan Z Designs — United States

- Serve as technical liaison between the design principal, subcontracted CAD designers, and clients, resolving design clashes and interpreting geotechnical recommendations.
- Conduct technical bid evaluations, verifying subcontractor pricing against engineering estimates and preparing comparative scope-of-work documentation for engineer approval.
- Review consultant shop drawings in AutoCAD for dimensional accuracy and specification compliance prior to formal submission; maintain a digital library of RFIs, SOPs, and technical resources.
- Assemble technical proposals and statements of qualifications, and maintain project databases tracking milestones, change orders, and long-lead material items.

Senior Construction Engineer January 2021 – November 2024

ABM Construction Plc — Addis Ababa, Ethiopia

- Defined project objectives and plans, including scope delineation, budgeting, scheduling, and performance requirements.
- Maximized efficient use of labor, materials, and equipment through procurement aligned with project schedules.
- Coordinated planning, design, estimating, contracting, and construction activities across the project life time.

Junior Engineer September 2015 – October 2020

Sagnif General Contractor — Addis Ababa, Ethiopia

- Monitored on-site work progress against the approved schedule and verified workforce output.
- Reviewed and approved completed work quantities for payment certification.
- Inspected work items for compliance with specified construction methodology and quality standards.

EDUCATION

- Addis Ababa University: September 2009 – July 2014 BSc degree, Civil Engineering
- ALX Africa: February 2022 – February 2023 Certificate, Software Engineering

TECHNICAL SKILLS

- Engineering Software: AutoCAD, SAP, ETABS, MS Project, Google Earth Pro
- Office & Productivity: MS-Office and Google Workspace
- Programming: Java Script
- Standards: familiarity with US building codes (IBC/IRC) from remote consulting work

LANGUAGES

- English — Professional fluency (written and verbal)
- Amharic — Native
